THRIFT

This Time of the Year.**NAVIGATION DISTRICT IS NOW CERTAIN**

"I believe in the United States of America as a government of the people, by the people, for the people, whose just powers are derived from the consent of the governed; a democracy is a legitimate, a wise, a safe, a just, a secure, a moral, honest, true, and invincible, established on those principles of freedom, equality, justice, and humanity for which American patriots sacrificed their lives and fortunes. I therefore believe it is my duty to my country to have it to support its constitution, to obey its laws, to respect its flag, and to defend it against all enemies."

FARMS

American farms are 2,164,510 acres, 1,515,513 under cultivation, and 2,508,991, pasturage, according to the 1920 census returns.

Life "down on the farm" is muchly up the ranch supports and our ranches. Ranches are giving the farmers the comforts that a decade ago were mainly unknown outside the city.

In this, this will solve the "class" to the "farm" problem. And so where it's most attractive.

SOUTH

The South's rainfall has gotten more rain, and more rain, and more rain, especially of course.

This is good for the south, but it's going to hurt the north, even of the White Woods. It means lower prices.

Millions are being drunk should bring good prices while a market for all of it. Yet the result of burning corn for fuel this winter. A lot of money in our system of economics.

SMOKES

Cigarettes made in the United States so far in 1921 are at the rate of \$1,100,000,000. That's nearly a billion more than last year. It's \$1.25 cigarettes for every person in the country, or a package every other week.

Cigar smokers are selling off with seven cigarettes sold for every cigar.

The anti-smokers point out a whole lot of jobs on their hands.

TREES

Two thirds of the original timber supply of the United States is gone, half of which is the wear of the decades. This is the report of the forestry conference at North Woodsboro, N. H.

America's forests produced of their natural resources more than half the wood.

With millions out of work, there would be no exceptions this time to instance. Washington has its hands full. One man has to stand on a stick in the woods.

SPLIT

The citizens of New York majority to start the major of Idaho farms, but a special highlights to timber production. Perhaps still though.

Norman and some members together between a split-up is inevitable. A minority party. The cause rises and spreads from the cause.

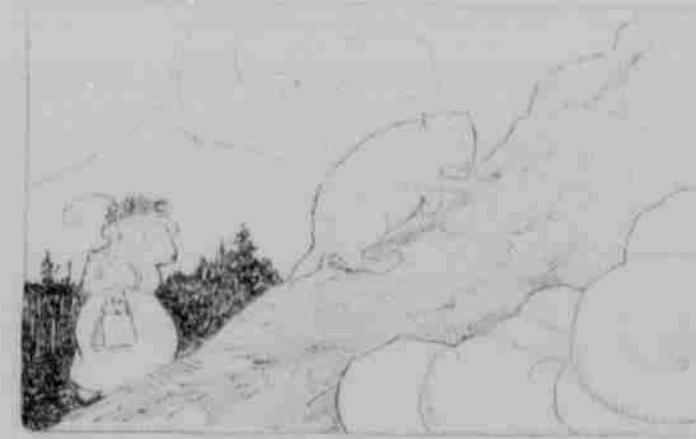

That's human nature and a good thing. Any individual movement without opposition soon goes to seed. People who make you fight harder are more helpful than flattering friends.

The bottle blowers' strike doesn't interest anyone as much as when bottle throwers strike.

Oddly, well water often makes the well sick.
